

Audio Visual Installation

Efficient and effective installation of audio visual (AV) and video conferencing (VC) systems

Total offers a complete AV and VC installation solution. You benefit from a professional installation and a correctly set-up system underwritten by a workmanship warranty.

Why would you want it?

AV systems are widely used in work, education and a variety of leisure services. As these systems become ever more sophisticated it's increasingly important that they are installed by engineers that understand the complexities of configuration, calibration and cabling. Total can provide experienced specialists to install a variety of AV and video conferencing solutions to board rooms, meeting rooms, receptions, class rooms, school halls, lecture theatre, malls, churches, theatres and more.

With an AV solution from Total you benefit from:

- impartial advice
- skilled and certified multi-skilled engineers
- a well-managed installation in accordance with manufacturer's specifications
- adherence to relevant health, safety and technical regulations
- one year's workmanship warranty.

What Total do

Should you require budgetary prices, Total will arrange for an experienced site manager to call and discuss your requirements in order to provide you with a budgetary price per install.

AV installations typically involve:

- a **site survey** or, for simpler requirements, planning call to establish the scope of the work
- provision of a **fixed price quotation**, specifying the work to be conducted
- **design** work, as necessary
- completion of a **Risk Assessment and Methods Statement**
- **installation** of projectors, interactive monitors/boards, cabling and control PC
- **tests** and agreed **sign-off** procedure.

Why Total?

Total has a well-established partnership with a specialist AV installer that works principally on projects for Total. This team of experienced, multi-skilled
